DETAILED ACTION

Allowable Subject Matter

1. Claims 9-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The references fail to teach, disclose, or suggest, either alone or in combination, pre-assembling the first side terminal attached to an end of a first side wire such that at least a large majority of the connection end of the first side wire is enclosed within the first side housing so as to provide first side terminal protection from damage prior to complete fuse connection box assembly and pre-assembling the second side terminal attached to an end of a second side wire such that at least a large majority of the connection end of the second side wire is enclosed within the second side housing so as to provide second side terminal protection from damage prior to complete fuse connection box assembly and in combination with the rest of the limitations of the base claims.

Applicant's arguments (Pages 5-6) with respect to the combination of the Urani and Bixler have been fully considered and are persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
